BASE TABLE FURNITURE / LIGHTING / ACCESSORIES

Mika Tolvanen on the design "I wanted the table to have its own character but not be imposing. The design aim was to reduce the table to its archetypal form. The functional simplicity of BASE is supported by behind-the-scenes technology to create a slim, light-weight and strong table. At the same time, BASE is friendly and welcoming in the way it looks. The result is a versatile metal frame table that can be extended into a very large conference table or just as easily used as a simple dining room table."

PROCESS The table base's legs and corner parts are extruded from aluminium to give the acrylic lacquer used to colour the base, the most homogeneous surface. The table-top is cut from furniture board and finished off with either a laminate or a linoleum surface.
